

Beech Mountain Lakes Association Inc.

Attention Residents: County Waste Information

Starting tomorrow County Waste will be putting out garbage & recycling containers to the resident. This process may take two days so if you do not receive the 2 containers by the end of the day Thursday please contact the administration office on Friday at [570-788-1010](tel:570-788-1010). Each resident will receive a 65 gallon garbage container and a 65 gallon recycling container. If the garbage container is too large or small they can be traded out for a different size garbage container. County Waste has a 35 gallon container and they are waiting for the shipment of 96 gallon containers to come in.

If anyone wants to change out the size of their garbage container please contact the Administration office at [570-788-1010](tel:570-788-1010).

The community garbage pickup day is going to continue to be on Mondays. The first garbage & recycling pickup in the specified cans will be on Tuesday January 2nd due to the Holiday.

It may take a week or two for County Waste to get all of the specified containers to all of the residents once the 96 gallon containers arrive. During this process, if you are unable to fit all of your garbage into the 65 gallon container please leave the extra garbage behind or along side of the containers at the road and County Waste will pick it up.

Thank you for your patience during this transition period.

Theron Hausman
General Manager
Beech Mountain Lakes Assn.
