

The background of the cover is a still life painting of autumn produce. It features several pumpkins and gourds in various shades of orange and yellow. In the lower right corner, there is a basket filled with purple and white grapes, along with other smaller fruits and vegetables. The overall scene is set against a warm, golden light, suggesting a sunlit autumn day.

JMSI provides professional cost effective mold inspections, testing and remediation services for residential and commercial properties in Eastern PA. In fact we have completed over 30 mold remediation projects for residents of Beech Mountain Lakes. Due to several factors mold is of a greater concern in BML than other areas. Limited direct sunlight, sloping lots, larger structures on smaller lots, rocky soil, excessive vegetation and part time or limited occupancy are all factors which can cause indoor moisture issues and mold concerns. Mold visible as black staining is common on attic roof sheeting as is mold visible as a bright colored powder substance on structural wood, insulation backing, furnishings and items in crawl space or basement areas. Contact JMSI today and let us put our 30 years of experience to work for you.
